

# Patient Comfort

Visit us online at  
[rasloimaging.com](http://rasloimaging.com)

Our truly Open MRI system combines a uniquely comfortable exam with high quality images.

- The system allows you to see all around you, reducing anxiousness and claustrophobia. In most cases, it also eliminates the need for sedation.
- You are able to bring a loved one to stand by you during the exam, making for a more personalized, enjoyable experience.
- The 1.2 Tesla magnet provides the highest quality images available from an Open MRI.
- The exam table is accommodating, with its wide design, and can be easily moved to put you in comfortable, relaxed positions for scanning. It can also be lowered and accommodates patients up to 660 lbs.
